

Hello, my name is Donnie Langehennig, and I understand the FCC is considering replacing some FM stations with a new Low Power FM station. I listen to K-Love, a family oriented station, and would like to see all their stations remain on the air. I travel from time to time and love to listen to their broadcast. K-Love serves and benefits all their listening communities by providing a positive influence for all age groups. It seems so many stations do their best to shock listeners and to push what is acceptable output on their airways. I enjoy K-Love and I do not worry what will be said on their station, I love for my nephew to listen also. He is ten years old and all the broadcast is acceptable.

If K-Love is removed it will affect the local communities. A positive influence that is removed will always be replaced by something else, and I doubt that K-Love will be replaced by anything that is as positive as K-Love. The fact that K-Love is listener supported speaks for itself.

In addition, K-Love represents a large group that does not receive representation from other local stations. Again, K-Love is listener supported; therefore, not removing K-Love from the airways is in the best interest of the public.

Thank you for your time and if you have any questions please email me at donnie_lang@yahoo.com.

Thanks,

Donnie Langehennig
